

Uniphar Medtech UK Limited – Carbon Reduction Plan 2024

Publication Date: 27th November 2024

Uniphar Medtech UK Limited is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint

Baseline Year: 2019

Emissions	Total (tCO ₂ e)
Scope 1	175
Scope 2	18
Scope 3 (Included Sources)	224
Total Emissions	417

Current Reporting : 2023

Emissions	Total (tCO ₂ e)
Scope 1	145
Scope 2	30
Scope 3 (Included Sources)	113
Total Emissions	288

Notes:

- 2019 baseline data has been revised since the 2023 CRP was created to allow for improved data and a calculation correction.
- Some of the decrease in Scope 3 total since 2019 is attributable to an improved methodology being used for 2022-onwards business travel emissions, due to distance data becoming available.

Emission reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

Uniphar plc, and each of its subsidiaries, including Uniphar Medtech UK Limited, formally submitted carbon reduction targets in 2023, which were validated in early 2024 by the Science Based Target Initiative (SBTi). Uniphar plc has committed to reduce scope 1 and 2 GHG emissions 50% by 2030 from a 2019 baseline year. Uniphar plc has also committed that 73.5% of its suppliers by emissions covering purchased goods and service, will have science-based targets by 2027.

Uniphar Medtech UK Limited aims to contribute to this reduction by implementing the carbon reduction projects discussed below. We believe that achieving a 50% reduction in Scope 1 & 2 emissions by 2030 will see us well on the way to achieving Net Zero by 2045.

Carbon Reduction Projected vs. Actual

Carbon Reduction Projects

As we work together with our supply chain, medical device manufacturers, suppliers and customers, we are removing and reducing our emissions through a number of specific programmes.

Fleet Initiatives:

A fleet upgrade programme is being undertaken where cars due for replacement are being replaced with EV vehicles where appropriate.

84% of our fleet is now comprised of battery or hybrid vehicles with 17% being Battery Electric Vehicles (17 % Battery Electric Vehicle (BEV), 4% Full Hybrid Electric Vehicle (HEV), 63% Plug in Hybrid Electric Vehicle (PHEV)).

Facilities and Utilities

Energy efficiency remains a focus for the group. Solar Panels are being considered where appropriate, alongside retrofitting and the purchase of energy efficient equipment.

We have a continued focus on sourcing sustainable packaging materials and have initiated a programme to shred and reuse incoming packaging for use on outgoing deliveries. During 2024 Uniphar plc started its Supplier Engagement Programme to work with its suppliers and partners in tackling the challenges of reducing emissions and identifying ways in which we can work together with them to reduce our collective emissions.

Medtech Sustainability Committee

We have set up a Sustainability Committee made up of employees from across our sites to identify sustainability initiatives that could be implemented locally by teams.

Declaration and Sign Off

Our Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans,

Our emissions are reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas and company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Signed: 

Name: Tim Dolphin
